

WEALTH MANAGEMENT AI

**2.3 hours per client
per week on prep.
Agents fix that.**

Swipe →

THE ADVISOR BURDEN

Senior advisors are doing junior work.

- 2.3 hours per client per week on data preparation
- 80-client book = 184 hours per week before any advising
- Portfolio data prep, compliance docs, reporting
- Real advising time squeezed to minutes per meeting

WHAT AGENTS AUTOMATE

All the prep. None of the advice.

- Portfolio data aggregation and normalization
- Compliance documentation from transaction data
- Performance reporting with benchmark comparison
- Rebalancing alerts with rationale for advisor review

CLIENT EXPERIENCE

More advisor time. Fewer data delays.

- Meeting prep packages assembled automatically
- Follow-up action items tracked and reminded
- Onboarding documentation handled without admin back-and-forth
- Client communication drafted and queued for advisor approval

COMPLIANCE LAYER

Suitability and KYC built into every action.

- Suitability check on every rebalancing recommendation
- KYC refresh triggered by life event signals
- Fiduciary documentation generated per client per year
- Audit trail readable by FINRA and SEC examiners

DEPLOYMENT RESULTS

Time freed. Capacity unlocked.

- 70% reduction in advisor time on data and documentation
- Book size potential increased from 80 to 120+ clients
- Compliance documentation completeness above 98%
- Client satisfaction scores improved from faster response

WHAT AGENTS CANNOT DO

The line advisors must never cross.

- Investment decisions without advisor approval
- Discretionary trades without explicit authorization
- Advice given without verified suitability documentation
- Client communication sent without advisor review

IMPLEMENTATION APPROACH

Start with prep. Earn trust for more.

- Phase 1: meeting prep and portfolio data aggregation only
- Phase 2: compliance documentation automation
- Phase 3: client communication drafting with approval queue
- Phase 4: rebalancing alerts and suitability monitoring
